

MONTE VERONESE DOP CHEESE

Cheese made with the best milk from the Lessinia Mountains of the Veneto region and located between Verona and Vicenza.

Cheese can be offered in two ways, because when made with Monte Veronese whole milk it has a very fresh characteristic and has a soft, butter-like feel and when made on Monte Veronese D'Allevo is made with skim milk following a longer aging process that offers a firmer consistency with a more intense color and a much stronger but always very pleasant flavor.
